DEVITA RAJENDRA AHER

SOFTWARE ENGINEER

91-7447478744 | softcrowdtech@gmail.com

SUMMARY

Passionate Full Stack Developer with over 1 year of hands-on experience in building scalable, secure, and AI-powered web applications. Proficient in modern frontend and backend frameworks with a strong focus on cloud deployments and machine learning solutions. Adept at driving end-to-end software development and delivering impactful real-world applications.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java
Frontend Technologies: Angular, HTML5, CSS3, Bootstrap, PrimeNG
Backend & Frameworks: Node.js, FastAPI, Flask, Django, Express.js
AI/ML & Data Science: TensorFlow, PyTorch, scikit-learn, Pandas, NumPy, OpenAI APIs, Whisper
Databases: MySQL, PostgreSQL, MongoDB, DynamoDB
DevOps & Tools: Docker, Git, GitHub, Postman, VS Code, CI/CD (Basic) Cloud & Deployment: AWS (Basics), Dockerized Deployments, REST API Hosting Version Control & Project Management: Git, GitHub, GitLab, JIRA (Basics)

PROFESSIONAL EXPERIENCE

Exilance Software - Full Stack Developer **Dec 2023 - Present**

- Developed and deployed scalable, full-stack systems using Angular (frontend), Node.js, Flask, and Python (backend), with a strong focus on cloud architecture and data security.
- Leveraged NLP, machine learning, and Generative AI technologies to deliver intelligent and impactful solutions for real-world business challenges.
- Designed and implemented an Optimizer module, a machine learning-based system that significantly improved planning efficiency by recommending optimal quantities and delivery dates.
- Built and deployed RESTful APIs across multiple projects, enabling smooth and secure communication between frontend and backend systems.
- Managed end-to-end deployment pipelines, ensuring stable, efficient, and high-performance delivery in production environments using tools like Docker and Git.
- Enhanced modularity and interoperability by developing robust API integrations, streamlining communication across different modules and third-party systems.

PROJECTS

1. Research Paper Metadata Extraction and XML Generation System

- Developed an intelligent system to extract structured metadata (titles, authors, affiliations, references, etc.) from research papers using NLP and machine learning models.
- Incorporated Generative AI techniques to intelligently handle poorly formatted sections and predict missing metadata with high accuracy.
- Engineered a scalable full-stack architecture with Angular (frontend) and Flask/Node.js (backend), integrating automated XML generation for seamless data transformation.
- Deployed a secure, cloud-based system with comprehensive error handling and support for multiple file formats (PDF, DOCX, etc.).
- Tech Stack: Python (NLP & ML), Flask, Node.js, Angular, TypeScript, XML

2. AI-Powered Mental Health Support and Management System

- Developed an AI-powered platform utilizing machine learning and NLP for early mental health condition detection and generating real-time insights.
- Designed and built secure role-based portals for patients, doctors, and administrators with features like patient records, appointment scheduling, and feedback tracking.
- Integrated interactive analytics dashboards for trend visualization, custom reports, and data-driven decision-making.
- Ensured end-to-end data privacy using encryption standards and secure storage protocols to safeguard sensitive mental health information.
- Tech Stack: Python, JavaScript, TypeScript, Angular, Node.js, Flask, TensorFlow, scikit-learn, Pandas, Generative AI, Git, Postman

3. Banjo's Restaurant Management System

Full Stack Web Application for Restaurant Operations

- Designed and developed a restaurant management system for Banjo's Restaurant using React.js for the frontend and FastAPI for the backend.
- Implemented modules for table booking, menu management, order tracking, and billing, improving operational efficiency by 60%.
- Integrated secure JWT-based authentication for admin and staff portals with role-based access.
- Developed RESTful APIs using FastAPI with asynchronous processing for optimized performance.
- Ensured responsive design and smooth UI/UX for mobile and desktop users using React hooks and modern styling practices.
- Configured deployment using Docker and GitHub Actions for seamless CI/CD.
- Tech Stack: React.js, FastAPI, PostgreSQL, Docker, JWT, HTML, CSS, Git

EDUCATION

SNJB COLLEGE OF ENGINEERING CHANDWAD, 2019 – 2023

Savitribai Phule Pune University

B.E Computer CGPA:9.38

ART, COMMERCE AND SCIENCE COLLEGE, NANDGAON, 2017 – 2019

Maharashtra State Board of Secondary & Higher Secondary Education, Pune

HSC Percentage:60%
